

TRAQMATZ

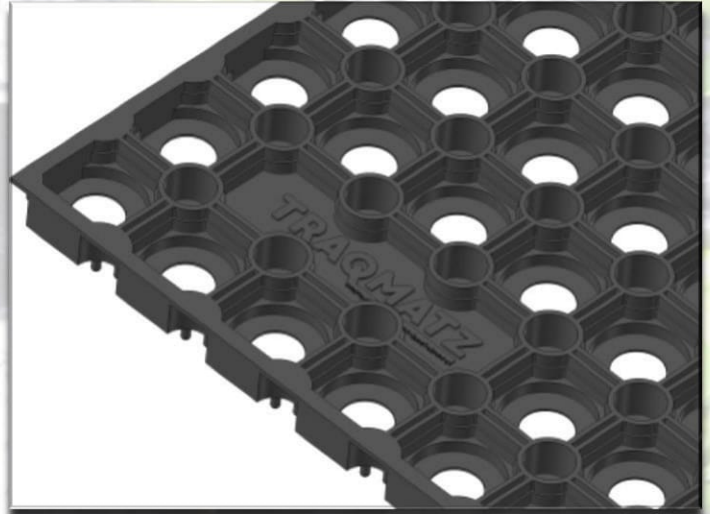

Ruggedly Safe

Ever tried to care for grass in a high-traffic zone?

It's not only unsightly, but grass deterioration can be a major slip and fall hazard. It's a complex problem that professionals ranging from golf course superintendents and playground installers, to parks and recreation managers, childcare facility operators and landscape architects face on a near-daily basis: How to keep lawns and play spaces beautiful and safe, all while keeping costs low and staying on budget? Replacing turf in high-traffic zones can be extremely expensive and time consuming.

TRAQMATZ is an environmentally-friendly turf protection and safety system that allows water to drain through turf and top soil, improving growth and preventing damage. Made of 50% recycled premium rubber, lightweight **TRAQMATZ** protect the crown and root of grass blades and other organic materials, allowing them to grow in high-traffic areas. Our mats are low maintenance, highly durable, non-slip and offer excellent fall protection. **TRAQMATZ** can also be installed for both short- and long-term use, delivering the flexibility you need to manage landscaping budgets and meet ever-changing turf maintenance needs. Each **TRAQMATZ** mat is 150cm x 100cm, weighs 12.5kgs (27.5 lbs) and is 22mm thick.

Best of all, **TRAQMATZ** become concealed in the turf in 6 to 8 weeks, making lawn mowing fast and easy.

TRAQMATZ

Ruggedly Safe

A unique industry leading locking system to ensure that **TRAQMATZ** stay safe and secure, using TRAQCONNECT and TRAQPINS.

How to Install

TRAQMATZ

- Mark and lay out the area that is to be covered by **TRAQMATZ**
- Repair major depressions by filling them with a sandy based topsoil and apply grass seed or sod over the repaired area.
- Lay **TRAQMATZ** over existing grass or sod within the area to be covered, pin outside of mats and use connection system above on inside or where mats join.
- If there are any obstacles, cut around them using a utility knife.
